WORK SURFACES

A 1/4" solid hardwood, fully-bullnosed edgeband embraces resilient .050" thick high-pressure plastic laminate. The underside of this border receives a 3/4" solid trim piece detail with a concave rout, inset 1/2" from the edge. All four corners are mitered at a 45-degree angle.

PANELS AND POST LEGS

Painstaking handcraftsmanship transforms select veneers and solids into the Ambassador collection's

Ambassador reading tables provide a handsome study space in Dallas, TX's Southlake Library.

stately panel frames. End panel faces are grade "A" plain sliced veneer. Each panel is framed with a solid hardwood border; a saw cut reveal on outside faces augments the juncture of panel and frame. The 5" x 1/4" bottom frame member receives the additional detail of a 3" high half-

moon cutout. As an added feature, the upper portion of the end panel frame may receive a decorative 20" x 20" frosted glass insert in place of the veneered panel.

The panel and post leg frame of this study carrel table is a hallmark of the Ambassador collection.

Post legs are a 3 1/2" diameter solid glued-up stock, trimmed back to a 2 3/4" diameter along the center portion and capped at both ends with a 5" square for a refined profile. Legs are

mounted to tabletops using an epoxy-coated steel plate and machine bolt assembly.

SEATING

The perfect complement to Ambassador study areas, Ambassador lounge chairs (in single, two-place and three-place configurations) boast a grade "A" veneered panel frame design. Their comfortable 4" foam seats and 4 1/2" foam backs are upholstered in a variety of select fabrics.

Ambassador side chairs are available with upholstered or saddled hardwood seats. Their solid hardwood frames feature a classic slat-back design and slightly radiused edges.

Ambassador side chairs feature eight solid back slats with upholstered or hardwood seats.
