

LEADING EDGE CONCEPT AND DESIGN

Palmieri Furniture

Two contrasting elements – hardwood and steel – come together to create the unmistakable profile of Palmieri's Linear collection. Angular and bold, Linear's modern design commands the attention of its beholder... and belies the traditional handcraftsmanship devoted to each piece.

WORK SURFACES

The Linear tabletop's 1¼" particleboard core is topped with .050" thick high-pressure plastic laminate, then edged with a 2" x 1¼" solid hardwood border. This band is tapered top and bottom to create a striking ⅝" "knife-edge," which is then eased. All four corners are mitered at a 45-degree angle.

Tabletop undersides receive two parallel 16-gauge steel tube stretchers, angled downward to assemble with Linear's steel frame (see below).

Work surfaces may be fitted with 3" diameter grommets and steel J-channels for wire maintenance.

PANELS AND TABLE RACKS

End panels for shelving ranges are grade "A" select veneered, 1½" thick particleboard, edged with a ⅝" solid hardwood band. Edges are machined and fitted with keyhole lock fasteners to receive a 1½" steel leg. Dictionary and atlas stands feature 1" thick side panels (back panels: ¾") comprised of grade "A"

veneered particleboard. Steel angle irons encircle the panels using spacers to create a floating effect.

All shelving and table racks, as well as study carrel table panels, are ¾" veneered particleboard core bordered with a ¼" thick hardwood band along the external edge. Shelves are mounted to panels using metal flanges; racks, using wood screws.

FRAMES AND LEGS

Steel and hardwood work in tandem to create Linear's stylish frame. Hexagonal chamfered solid wood legs embrace a 1½" diameter 16-gauge tubular steel post that extends 2" beyond the wood at top and bottom. In table designs, these posts are welded to a 2½" diameter horizontal top frame, which protrudes from the short ends of work surfaces by 3½".

To ensure lasting resiliency, all steel components receive a baked powder epoxy enamel treatment that is available in a variety of textured finishes.

THE LINEAR PRODUCT LINE

The Linear line of furnishings is available in a variety of standard finishes.

For complete product line details, please consult the Palmieri Furniture Ltd. Product Specification Manual or contact your local Palmieri Furniture dealer.

■ Atlas Stand

■ Dictionary Stand

■ End Panel (Single- or Double-Faced)

■ PAC Table (One-, Two-, or Three-Place)

■ PAC Terminal (Three- or Six-Place)

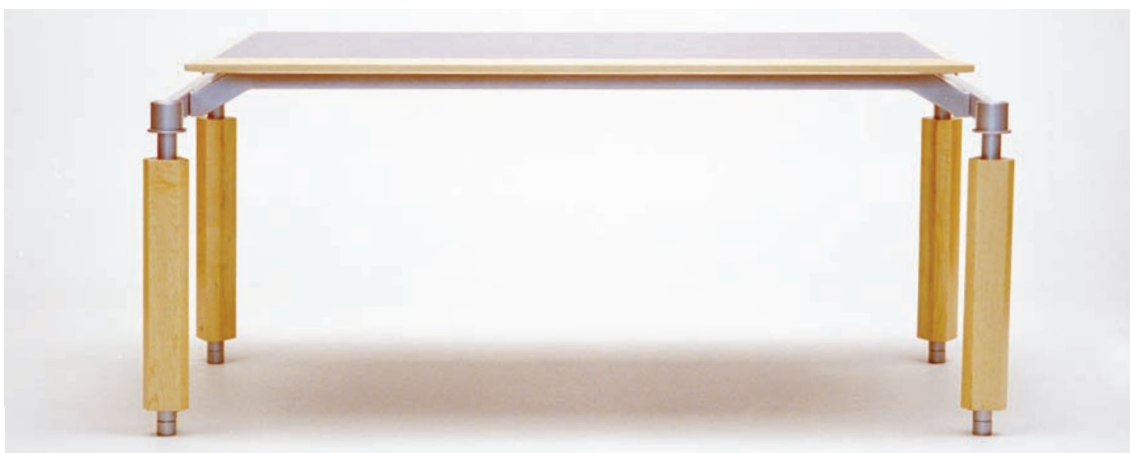

■ Reading Table (Rectangular, Round or Square)

■ Study Carrel Table (Single, Double or Four-Place)

■ Display Case
